Name: J.M.Singh**City: New Delhi****Organisation: SMEC****Country: India**

I have gone through the PDD. The project developer has used the Baseline emission factor calculated by the the CEA. If we look the calculation sheet, it looks like a data's sheet produced by CEA. It is very difficult to understand the process of calculation to arrive to the final figure as there are no formula's provided in the calculation sheet. Hence, CEA's Baseline emission factor can not be acceptable just giving the argument that CEA is a government organisation.
