1. As mentioned in part D.1, it is not true that Environmental Impact Assessment is not required for establishment of power plant. It is required as per S.O.1533 dated 14 September 2006.
2. As mentioned on page no. 7 there is no regulation on use of fossil fuel but there is regulation on air emission from plant through Consent under Air Act and Environmental Clearance.
3. At page 7 it is written that project activity takes place at completely newly installed facility. Please check as Electrotherm India Ltd. is existed at this place for sponge iron manufacturing.
4. Environmental Impact Assessment for expansion of Electrotherm plant was carried out in year 2006 including cogen coal based power plant. It has mention of impacts of project on environmental parameters mainly air, noise, water and ecology. Please check as per the guideline in same report whether Environment Management Plan is operative?
5. Is there any national or international guideline from concern authority for monitoring of CDM project? Please explain.
6. Whether local villagers would be beneficiary of CDM revenue earned by company? Any plan has been develop to earmark certain fund from CDM revenue for community welfare?
